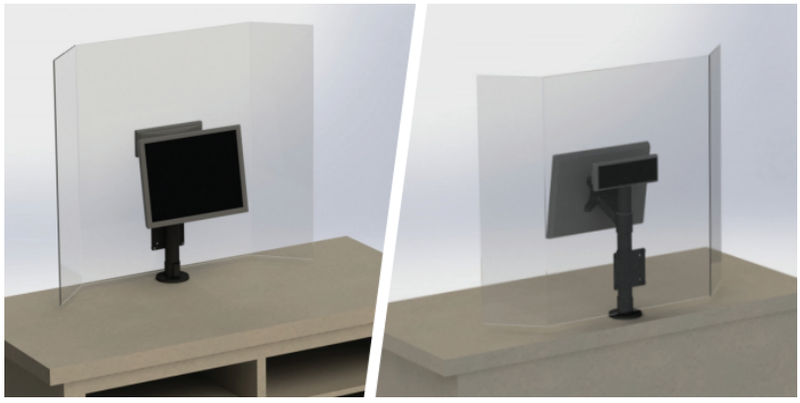
COVID-19 Solutions

SafeGuard Protective Screen

spacepole®
an ergonomic solutions company



PRODUCTS INCLUDED:

- Spacepole SafeGuard Protective Screen

Social Distancing to Protect Operators & Customers

SpacePole range of technology mounting solutions, are offering the SafeGuard Screen - a low cost and simple to install acrylic screen which creates a protective barrier for everyone at the point of sale.. The screen can easily retrofit to existing SpacePole installations or complement existing hardware without taking up any transactional space in the packing or payment areas. SafeGuard screens are perfect for all types of food and non-food retail as well as hospitality and healthcare applications.

The SafeGuard screen is an unobtrusive solution, which does not affect the current operator/customer interface. For example, the customer display is on the customer side of the screen and likewise, the payment terminal and loyalty scanner. As with all SpacePole products, the screen is customized to fit your requirements, as part of an existing or new installation.

Features / Benefits

- Curved screen provides excellent protection for operator and customer
- Design provides for easy customer access to payment terminal
- Screen position can be adjusted to suit preferred working height thanks to VESA mounting
- Simple design minimizes installation overhead
- Minimal disruption to retail operations and the customer experience
- SafeGuard solutions to fit a variety of existing SpacePole solution configurations
- Meets customer hygiene expectations as well as protection for store operators
