Providing Contactless Delivery

Amidst new stay at home guidelines, last mile deliveries have surged, especially for essential goods. Couriers are under pressure to deliver critical orders whilst adhering to new safety protocols such as contactless delivery at the doorstep to ensure driver and customer safety. Honeywell is here with a solution for you!

Features & Benefits

- Honeywell CT60 mobile computers are designed for delivery drivers that require real-time connectivity to business-critical applications
- CT60 mobile computer enables the driver to scan the items and verify delivery with photos or SMS which can be sent to the customer as proof-of-delivery.
- Voice as a signature can be used instead of requiring customers to touch the device
- Reads barcodes that are damaged or poorly printed at non-traditional fulfilment centers with ease, ensuring that packages that would not have been delivered reach their destination.
- ProntoForms is a thirdparty custom app platform for easily adapting or building custom delivery workflows with no-touch delivery confirmation.
- RP4 mobile printers provide last minute relabeling capability to the delivery drivers for incorrect or misaddressed shipments.
